

Recombinant SARS-CoV-2 Nucleocapsid Protein, Omicron variant, P151S

Catalog Number: 19CoV-S270

Protein Name: Recombinant SARS-CoV-2 Nucleocapsid Protein, Omicron variant, P151S

Protein Purification: Full-length SARS-CoV-2 Nucleocapsid protein, Met1-Ala419, with point mutation P151S and a C-terminal His-tag.

Alternative Name: Protein N, NC, Lambda variant

Protein Construction: N protein with C-terminal His-tag

Endotoxin: <0.1 EU/ug

Expression Host: E. coli

Protein type: Recombinant

Purification tag: His-tag

Formulation: PBS

Regulation restrictions: For research use only

Shipping: Recombinant proteins are provided as frozen liquid and will be shipped out with dry ice

Stability and storage: The protein is stable in a liquid state at -70°C for 12 months. Avoid repeated freeze-thaw cycle

6440 Lusk Blvd, San Diego, CA 92121
